PROBLADE™ 101R

Pro-Blade™ White Cloth Tape

DESCRIPTION

Specially designed for today's composite hockey sticks, Pro-Blade™ White Cloth Tape from Renfrew Pro™ incorporates an advanced adhesive formulation applied to a polyester/cotton cloth base, resulting in a more substantial cloth tape with increased wear characteristics.

This premium cloth tape comes in White, while also available in black, colours, patterns and black friction tape. Also available in our Renfrew™ Pro Season Tape Pack with 20 rolls of white Pro-Blade™ Cloth Tape, or our combo pack that includes 6 white and 4 black Pro-Blade™ Cloth Tapes and 10 Polyflex®. Clear Shin Pad Tape rolls.

RECOMMENDATIONS

Application to Surface: Unwind adhesive film or tape and apply the adhesive side to the mounting surface. Apply firm pressure. Recommended application temperature to achieve best results is 65°F (18°C) or above. Proper bonding may not occur unless adhesive and surface material are both at 65°F (18°C) or above.

NOTE:

1. When applying pressure sensitive adhesive films to any surface, be sure that the surface is free from oil or other surface contaminants such as powder, dust, or release agents. Adhesive performance should be carefully checked when used on substrates containing plasticizers.
2. Shelf life is one year from date of shipment when stored in a cool dry place below 76°F (24°C). Rolls should be stored on end.
