

PROBLADE™ 107R

Pro-Blade™ Black Friction Tape

DESCRIPTION

Specially designed for today's composite hockey sticks, Pro-Blade™ Black Friction Tape from Renfrew Pro™ incorporates an advanced adhesive formulation applied to a polyester/cotton cloth base, resulting in a more substantial cloth tape with increased wear characteristics. This premium cloth tape offers advanced Friction technology, featuring adhesive on the inside and tack on the outside for top performance and control.

APPLICATIONS

- Stick handles and blades

PRODUCT BENEFITS

- Tack on outside surface provides a "grip-like" surface for advanced puck control
- Improves grip on handle
- Moisture resistant
- Protects stick from abrasion

TECHNICAL PROPERTIES

| Technical Property | Nominal Value | Unit | Test Method |
|--------------------|---------------|-------------------------|-------------|
| Total Thickness | 14.0 (.356) | Mils (mm) | REN TM 20 |
| Tensile Strength | 48 (213.6) | lbs. / inch (N/25mm) | ASTM D 1000 |

STANDARD PRESENTATIONS

- Colours: Black

RECOMMENDATIONS

Application to Surface: Unwind adhesive film or tape and apply the adhesive side to the mounting surface. Apply firm pressure. Recommended application temperature to achieve best results is 65°F (18°C) or above. Proper bonding may not occur unless adhesive and surface material are both at 65°F (18°C) or above.

NOTE:

1. When applying pressure sensitive adhesive films to any surface, be sure that the surface is free from oil or other surface contaminants such as powder, dust, or release agents. Adhesive performance should be carefully checked when used on substrates containing plasticizers.
2. Shelf life is one year from date of shipment when stored in a cool dry place below 76°F (24°C). Rolls should be stored on end.
